Date:	11/5/25 1:41 AM/9/12/26 6:58 PM	File:	RiegoAutomático.lsc	Page:	12 / 32

Para futuros errores: Los UDFs que tengan conectados a su salida una salida física, todas sus entradas deben de tener un estado marcado. O sea no pueden estar desconectadas porque aunque en la simulación funcione como un False físicamente no, por lo que se generan incongruencias entre la simulación y la realidad.

Creator:	simon	Project:		Customer:
